Anti-Glare-Anti-Scratch (AGS) Display Film Pokini Tab A10,

Anti-reflection coating, scratch and smear protection!

The Anti-Glare Anti-Scratch (AGS) film is suitable for universal use as display or surface protection films. A special surface treatment effectively reduces disturbing reflections on the surface.

Typical areas of application are:

Reduction of display reflections and professional protection of the sensitive display surface against mechanical damage. In addition, the AGS film shows excellent chemical and thermal resistance.
