Vehicle Dock (incl. xDIM G3 and CLA) Zebra XPAD/ XSLATE

The L10 Vehicle Dock protects and secures the XBOOK L10 2-in-1 Laptop / Tablet, the XSLATE L10 Slate Tablet and the XPAD Tablet with fixed carry handle (hard handle) against strong shocks and vibrations. This rugged, lightweight vehicle mount also withstands the bumps and bends of the road while the tablet remains stable for navigation. Once the employees have reached their destination, the "Grab and Go" design allows the tablet to be quickly unlocked from the dock with one hand. The integrated xDIM G3 docking interface module supplies power to the tablet via a cigarette lighter socket. The xDIM G3 has two USB 2.0 ports to connect peripheral devices to the tablet. (Cradle is only compatible with the rugged L10 tablet models)
