Dockingstation USB-C 100 W

I-Tec

i-tec USB 3.0 / USB-C / Thunderbolt, 3x 4K Docking Station + Power Delivery 100W

A powerful professional docking station that supports output to up to three external monitors in up to 4K high resolution. The dock can be used with virtually any laptop as it supports connection to all popular ports: USB 3.0, USB-C and Thunderbolt 3/4, while supporting all major current operating systems. However, connection to three monitors is only possible if the laptop has a Thunderbolt 3/4 port or a USB-C port that supports video transfer (USB-C DP Alt mode).

Numerous USB ports (including those that support speeds of up to 10 Gbps), reliable and fast connection to the corporate network thanks to the integrated LAN port, and support for installation behind the monitor make this docking station the ideal companion for true professionals. Of course, it supports charging your laptop or tablet with up to 100 W.

When the docking station is connected via USB 3.0, laptop and tablet charging is not supported

*The HDMI 3 port only works when connected to a laptop with Thunderbolt 3/4 port or USB-C port that supports video transfer (so-called USB-C DP Alt mode).
