exone Business Compact: THE SMALLEST FULL-SIZE TOWER PCS

You know that sometimes less is more? Then definitely take a look at the new exone Business Compact series. Our team has packed a full-fledged standard PC into a case that has only half the usual volume: twelve instead of the usual 25 liters.

This means for you: even more space at the workplace for the really important things. All standard CPUs can still be used, also thanks to the clever cooling design.
