anti-glare anti-scratch (AGS) screen protector Zebra XPAD/

Anti-reflection coating, scratch and smear protection!

The Anti-Glare-Anti-Scratch (AGS) film is suitable for universal use as display or surface protection films. A special surface treatment effectively reduces disturbing reflections on the surface.

Typical areas of application are:

Reduction of display reflections as well as professional protection of the sensitive display surface from mechanical damage. In addition, the AGS film shows excellent chemical and thermal resistance.

Technical data

Highlights

- extremely robust and durable
- offers protection against dirt and grease spots
- reduces fingerprints and minimizes glare
- replaceable and does not leave any sticky residue
- ideal for outdoor use, in dirty/dusty environments or in applications with a variety of consistent pen movements
