Back-Cover-Extension with Seriell (2x RS-422/485) Pokini Tab

More connections, more possibilities

The Pokini TAB A8 with Back-Cover Extension offers an ideal solution for schools, educational institutions, as well as mobile workspaces and seminars. This extension enables the integration of a variety of additional interfaces, including LAN, serial ports, USB 2.0, and GPIO. Thanks to the wedge-shaped extension that simply replaces the battery cover, an optimal viewing angle is provided for more comfortable work. With a tilt angle of 13°, optimal visibility is ensured without the need for additional brackets or stands.

Here's a selection of available interfaces:

- 1D/2D barcode scanner
- 2x serial
- 2x LAN
- 3x USB 2.0
- GPIO (General Purpose Input/Output)

Technical data

Suitable for

Pokini Tab A8, A8B

Highlights

- automatic detection and switching between RS-422 and RS-485
- incl. 12V power connection
- the 13° angle function offers optimal viewing angles for easier working
- optional transport solution with loading function available
- also compatible with the docking station (83346)
- Mounting instructions: please remove the rubber cover above the contacts before attaching the back cover extension to the tablet!
